

Drug lists for HASTA NATA accredited human hair testing

Drugs of abuse (DOA) screen for human hair samples:

Detailed Drug List:

Opiates & Opioids	Stimulants & Hypnotics	Benzodiazepines & Sedatives	Non-Steroidal Anabolic Drugs
6-Monoacetylmorphine	Methamphetamine	Clonazepam	Clenbuterol
Morphine	Amphetamine	7-Aminoclonazepam	Zilpaterol
Hydromorphone	Cocaine	Flunitrazepam	GW1516
Buprenorphine	BEG	7-Aminoflunitrazepam	SARMs
Norbuprenorphine	Norcocaine	Nitrazepam	AC-262356
Codeine	Cathinone	7-Aminonitrazepam	ACP-105
Hydrocodone	MDMA	Alprazolam	Andarine
Dihydrocodeine	MDA	Bromazepam	GSK2881078
Tramadol	MDEA	Bromazolam	LGD-4033
Desmethyldramadol	MDPV	Clobazam	LGD-2226
Methadone	Mephedrone	Clonazolam	Ostarine
EDDP	Methcathinone	Diazepam	PF-06260414
Pethidine	Methylphenidate	Nordiazepam	RAD140
Norpethidine	Modafinil	Etizolam	SR9009
Oxycodone	Modafinil Acid	Flualprazolam	TFM-4AS-1
Oxymorphone	Phentermine	Flubromazepam	YK-11
Tapentadol	PMMA	Flubromazolam	Psychoactives
Fentanyl	PMA	Lorazepam	25B-NBOMe
Alfentanyl	Ketamine	Midazolam	25C-NBOMe
Norfentanyl	Norketamine	Oxazepam	25D-NBOMe
	Tiletamine	Temazepam	25E-NBOMe
Natural & Synthetic Cannabinoids	2F-NENDCK	Triazolam	25H-NBOMe
AB-Fubinaca	Dimethyltryptamine	Xylazine	25I-NBOMe
CBD	Mescaline	Zolpidem	LSD
THC		Zopiclone	Psilocin

Reporting Thresholds:

Drug Test Class	Test Method	Threshold (pg/mg)
Opiates & Opioids*	MS115	20
Stimulants & Hypnotics	MS115	20
Benzodiazepines & Sedatives	MS115	20
Natural & Synthetic Cannabinoids#	MS115/MS117	20
Non-Steroidal Anabolic Drugs	MS115	20
SARMs	MS115	20
Psychoactives	MS115	2

Exceptions:

* Alfentanyl, Fentanyl, Norfentanyl: 2pg/mg

11-nor-delta-9-tetrahydrocannabinol-9-carboxylic acid: 1pg/mg

Steroid screen for human hair samples:

19-Norandrostenedione	Gestrinone	Oxandrolone
4-Androstene-3, 17-dione	Mesterolone	Oxymetholone
Boldenone	Methandienone	Stanozolol
Boldenone undecanoate	Methasterone	Testosterone
Boldenone undecylenate	Methenolone	Testosterone 17-phenylpropionate
Boldione	Methyltestosterone	Testosterone benzoate
Calusterone	Mibolerone	Testosterone cypionate
Clostebol	Nandrolone	Testosterone decanoate
Danazol	Nandrolone decanoate	Testosterone enanthate
DHEA	Nandrolone phenylpropionate	Testosterone isocaproate
Drostanolone	Norbolethone	Testosterone propionate
Epitestosterone	Norclostebol	Testosterone undecanoate
Fluoxymesterone	Norethandrolone	Trenbolone
Formestane	Normethandrolone	Turinabol

Reporting Thresholds:

The reporting threshold for anabolic steroids ranges from 1 – 10pg/mg, depending on the drug.

The test for steroids in hair is accredited for quantitation of the following **endogenous** steroids only:

- Androstenedione
- Testosterone
- Epitestosterone
- DHEA

Testosterone is reported in male samples at concentrations >5pg/mg, as this level is considered elevated.

Current as at 3 December2024
